

PFAS in Our Water Supply: Grand Challenges and Ethical Solutions

Cheryl Murphy

Over 12 000 per and poly-fluoroalkyl (PFAS) substances have infiltrated our water supplies and contaminated our food. These substances are harmful to our health and our environment. In this talk I will discuss the grand challenges associated with PFAS contamination, discuss ways to address the issues and assist the people impacted, and initiate conversations about possible ways to navigate this problem to address and implement solutions, from a one health perspective.
