

Jerry Johnston is a Managing Director in Deloitte Risk and Financial Advisory's Strategic Risk practice with over 20 years of experience in leading the design, development, implementation and management of numerous IT programs and projects. He is a recognized geospatial technology expert and thought leader who specializes in developing advanced geospatial technology solutions that support public sector customers. In his prior work at the Department of the Interior and the US Environmental Protection Agency, Dr. Johnston held senior executive positions and led the technical design and development of the US Geospatial Platform ([www.geoplatform.gov](http://www.geoplatform.gov)), a whole-of-government shared services initiative that supports public sector organizations in publishing, finding, accessing and using geospatial data, maps and applications. Dr. Johnston holds Ph.D. and MS degrees in Environmental Science from Indiana University, where his research was focused on the use of geospatial technology to support regional scale ecosystem modeling, and a BS degree in Environmental Science from Michigan State University (Lyman Briggs School). Dr. Johnston was appointed by Secretary of the Interior to serve as a member and Vice Chair of the National Geospatial Advisory Committee from 2008 - 2014. He currently serves as a member of the Board of Directors of Radiant Earth, a not for profit organization that enables the use of geospatial data and technology for international development efforts, and as a representative to the United Nations Group on Global Geospatial Information Management (UN-GGIM).
